Heat Trace Systems—Our only business.

DIAMOND THERMAL SYSTEMS

CAPABILITIES & SERVICES

We specialize in electric heat trace products and services. In fact, it's our ONLY business. We bring over 20 years of experience and expertise to every project, regardless of size, complexity, or location.

What this means for YOU

We ARE your thermal solution. We can provide you with independent design, sales, service, and support service to assist you with a range of heat transfer products and services, including:

- Specification and Design Services
- Heat Trace Systems Audits and Recommendations
- On-Site Project Management
- Startup and Commissioning of New or Retrofit Projects
- CAD Drawings and Complete Documentation Services
- Mineral Insulated Cable Heat Trace Repair Services

Electric Heat Trace Systems — Our Only Business

Although straightforward in concept, properly designed, installed, and maintained electric heat trace systems can be complex to plan and to implement.

These systems are crucial to your business, and we can make it our business to keep them running properly. We can provide you with a broad spectrum of solutions tailored to YOUR needs, including:

- Turnkey Projects
- Complete System Design
- Installation and Project Management
- Quality, Durable, and Reliable Electric Heat Trace Products and Accessories
